FOR IMMEDIATE RELEASE

**HOUSTON BIOENERGY COMPANY TERRABON APPOINTS
TRI NGUYEN AS GENERAL COUNSEL**

HOUSTON (March 7, 2011) — Terrabon, a Houston-based technology transfer company delivering sustainable bioenergy solutions, announced today that it has retained Tri Nguyen to act as general counsel on behalf of the company's operations. Nguyen will manage legal standards, policies, procedures, initiatives and regulatory compliance within the organization. As part of Terrabon's management team, he will work alongside other executives to foster the achievement of Terrabon's business development and goals.

Nguyen's experience includes advising entrepreneurs on entity formation and general corporate matters, and start-ups on angel and venture capital funding, private securities offerings, and general business and commercial transactions. He has also counseled mid-market and public companies on general corporate matters, commercial and business transactions, and acquisitions and dispositions of assets and entities.

"We look forward to having Tri on our team as Terrabon continues to strategically grow our business," said Gary W. Luce, chief executive officer of Terrabon. "His unwavering business sense and previous experience in counseling countless corporations will be invaluable to us."

Previous to his position with Terrabon, Nguyen was a senior attorney with Phillips & Reiter where he provided various services such as outsourced general counsel to established companies and start-ups. Prior to Phillips & Reiter, he was the managing shareholder of Tri Nguyen Law Office PC and initially began his career as an associate at Andrews Kurth LLP. Nguyen graduated Summa Cum Laude from The University of Houston where he received a Bachelor's degree in journalism and his Juris Doctor from the university's Law Center.

Nguyen has been a member of the board of trustees for the Houston Lawyer Referral Service and on the board of directors for the Asian Pacific American Heritage Association. He has also served as a Vice President of Programs for Asian American Bar Association and Co-Founder/Chief Articles Editor for the Houston Business and Tax Journal.

About Terrabon, Inc.

Terrabon, Inc. is a bioenergy technology company formed in 1995 to commercialize three technologies developed by the Texas Engineering Experiment Station, a member of the Texas A&M University System. Terrabon plans to deploy these cutting-edge technologies through licensing and joint venture arrangements. Its MixAlco® technology converts biomass to green gasoline. AdVe™ is a water desalination process that utilizes advanced vapor-compression evaporation to desalinate salt water into potable water. SoluPro™ is a bio-products process that converts inexpensive protein-bearing waste material into animal feed and "green" commercial adhesives. These technologies are exclusively licensed to Terrabon by the Texas A&M University System through its Office of Technology Commercialization. Please visit Terrabon's website at www.terrabon.com.
